

New SWD doors transform dated property

Discover how **SWD** can breathe new life into your home – simply by changing your doors

In addition, the old UPVC double glazed french doors were replaced by modern solid wood folding sliding-doors fitted with double glazed units with integrated blinds – opening up the rear of the house to the garden in the summer months.

The front door was also replaced, with a modern, solid oak door & frame and a full length side screen, ensuring that the front of the house was in keeping with the new modern interior. The front door also benefits from the latest secure three-point locking system.

Solid Wooden Doors supply to retail customers, tradesmen, developers, interior designers, contractors and architects. All products are available in all sizes with any finish or style – whether it's contemporary or classic – including fire doors.

Solid Wooden Doors have just completed the supply and installation of new walnut doors to a large five-bedroom 1930's house in Weybridge. The client was keen to remove their dated, hollow white panelled doors and make their home more contemporary. They specified grooved walnut doors with matching frames and architraves (a prehung doorset). SWD supplied and fitted the custom made door sets, each door weighing 40-45 kg or 6 stone. The final result was stunning; transforming the house into a modern and contemporary home.

"The whole service was pain free, they fitted all the doors inside a week and in that time completely changed our home. The quality and finish of the doors is outstanding. SWD could not have been more helpful and professional."

New high quality solid doors can add value to a home in just the same way as a new kitchen or bathroom. In a typical home the square footage of space used by doors is third only to the floors and walls, and represents a huge opportunity to smarten and modernise a house. Exchanging old doors for high quality solid doors or doorsets will automatically add value to any home.

The project included: 16 single doorsets, three glazed double doorsets, four wardrobe door sets, solid walnut plinth blocks, solid walnut thresholds and full fitting. The model of door throughout was A1006 in walnut with 90mm D shaped architraves.

All the photos of this stunning transformation can be found on SWD's website.
